#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 3-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. in view of Vazvan et al.

Lee et al. shows all of the limitations of the claims except for evaluating or calculating price.

Lee et al. shows, figure 6, a method for dynamically updating master controllers (electric device). Steps 201 and 203 show receiving a list of available files from a remote site (providing software merchandise). Step 206 shows selecting (communicating) files (parts) from list. Step 208 retrieves the custom selected files (outputting). Step 211 updates software and/or firmware (upgrading prior version). From column 14, version identifiers (serial numbers) are used to identify version, age, compatibility and other information associated with software on master controller 28. Software may include content provider interfaces to provide communication services with various content providers, other user or retailer (payment/authorization inherent) added software, or other suitable software. For example, a security and home protection service may load custom software onto master controller 28. The software

Page 3

elements may have respective associated identifiers that may be used by the present method or the various software elements may share identifiers.

Vazvan et al. teaches a multimode universal mobile telecommunications system. Column 11, lines 43-46 teach a well-known concept, by adding software and signaling information, the selection could be based on the evaluation of the price, capacity and quality, or only the price, for example. This is done in order to get the best value for your money.

Based on the teaching of Vazvan et al., it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Lee et al. system to incorporate an evaluation of software versus price in order to get the best value for your money.

### Response to Arguments

Applicant's arguments with respect to all claims have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/005,101 Page 4

Art Unit: 3627

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Cuff whose telephone number is (571) 272-6778. The examiner can normally be reached on 8:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on (571) 272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
